ABBEY COLLEGE CAMBRIDGE

E-Safety Policy

Abbey College Cambridge

SLT Responsible for this Policy: Carolyn Dunn, Vice Principal (Pastoral), Helen Walker, Director of Boarding, and Mike Corbett, Director of Operations

Telephone: 01223 578280

Email:

Carolyn.dunn@abbeycambridge.co.uk

Helen.walker@abbeycambridge.co.uk

Mike.corbett@abbeycambridge.co.uk

This policy is reviewed on an annual basis		
Annual Policy reviewed by:	Mike Corbett	June 2021
Approved by SLT and Published:		June 2021
Next Review:	Mike Corbett	June 2022

This policy has been approved by SLT and adopted on behalf of the Governors, and is addressed to all members of staff and volunteers and is available on the school's portal. It is available to parents on request. It applies wherever staff or volunteers are working, including when this involves being away from the school.

Scope and definition

This policy is part of our strategy for safeguarding children within our care. It complies with *Keeping Children Safe in Education (KCSIE) September 2020* and Teaching Online Safety in Schools DfE 2019.

E-safety is a broad term which we use to refer to the safeguarding of children in relation to the risks arising from ever-evolving new media and technologies such as: the internet, mobile phones, tablets, computers, gaming devices, instant messaging, social media, collaboration tools, personal publishing and ‘apps’ in general.

The responsible use of technology is a multi-dimensional, social and behavioural issue. Although the generic term ‘E-safety’ implies a response to some specific risks (as described below), we do not regard it as a stand-alone topic. It is embedded within our educational processes and consequently we take a holistic approach to keeping children safe. This policy should therefore be read in conjunction with our other policies, notably:

- Safeguarding
- Anti-Bullying
- IT Usage
- PSHEE
- Mobile Phones, Photos and Images
- Social Media

Responsibilities

The designated safeguarding lead should take lead responsibility for safeguarding and child protection (including online safety). Taking into account the multi-dimensional aspects of E-safety, it is essential that specific responsibilities are also clearly assigned to specific individuals based on their skills and experience.

Aspect of E-safety	Designated person ¹
IT Coordinator	Mike Corbett
On-site Engineer ²	Simon Tee
Curriculum - ICT	Andy Humphris
Curriculum - PSHEE	Carolyn Dunn
Staff Training & CPD	Carolyn Dunn
Development of Parental Awareness	Helen Walker/Carolyn Dunn

¹ A person may cover more than one aspect if they have the appropriate experience and skills-set.

² Even if not directly employed by Alpha Plus, the on-site engineer must sign the annual affirmation statement as required by the Code of Ethical & Professional Conduct (available on the Portal).

Clarification of the relationship between the IT Coordinator and the On-Site Engineer

Although the maintenance of technological controls (see section below) such as internet filtering, and data and network security are the responsibility of the Alpha Plus Group Director of IT and administered by the On-Site Engineer, **it is essential that a member of school/college staff is nominated as IT Coordinator and is assigned responsibility for monitoring the effective delivery of these services on behalf of all school/college users, and for reporting problems where necessary.** The IT Co-ordinator may well be also responsible for the IT curriculum, but it is important that these two responsibilities are clearly understood as separate functions.

Training and CPD

Those responsible for E-safety will keep up to date on current E-safety issues and guidance issued by the Government and by organizations such as their Local Authority, CEOP (Child Exploitation and Online Protection), and Childnet International.

Consistent with our *Safeguarding policy*, all staff:

- receive information and training on E-safety. All staff members will receive training, as part of their induction, on safe internet use and online safeguarding issues including cyber-bullying and the risks of online radicalisation.
- All staff members will receive refresher training at least once each academic year as part of safeguarding training, as well as relevant updates as required (for example through emails, e-bulletins and staff meetings).
- have a duty to be alert to E-safety, and to share any concerns with the DSL (and others as appropriate in the context).
- The DSL and deputies will undertake child protection and safeguarding training, which will include online safety, at least every 2 years. They will also update their knowledge and skills on the subject of online safety at regular intervals, and at least annually.

Understanding the types of E-safety risk

Risks commonly associated with new media and technology are broad. In most cases the risks are not intrinsically caused by technology, but technology may increase the ease and likelihood of occurrence and increase the scope of potential harm. Risks include:

1. Predatory behaviours such as grooming, abuse or radicalization,
2. The corruption of young minds through the normalization of disrespectful or anti-social language and behaviour through exposure to age-inappropriate content³, especially: violence, pornography, racism, sexism, gambling, advertising, etc.
3. Extensions of 'off-line' peer-behavioural risks, e.g. cyber-bullying, 'trolling',

³ Online games designed for adults are often cited as one of the principal causes of concern for several of these risks. This may be as much from the highly aggressive and verbally abusive behaviours they elicit as from the be-friending of pseudonymous strangers or from exposure to violent and sexual content. **Extensive exposure to such games may be considered evidence of child neglect, which may, in certain circumstances, lead schools/colleges to consider reporting parents to social services.**

4. The misplaced perception that aggressive, offensive and inconsiderate on-line language or behaviour is somehow less damaging and more acceptable than their equivalents off-line or face to face.
5. The degradation of educational and maturing processes arising from a child's misplaced judgement of the accuracy, reliability or contextual propriety of online content,
6. Breaking laws, e.g. sexting, copyright infringement, data protection/privacy breaches,
7. The lasting damage to self-esteem and to reputation which children may incur (to themselves or to others, thoughtlessly or maliciously) by distributing or publishing confidential, insensitive, offensive or otherwise inappropriate content,
8. Exposure to fraud, hacking or identity-theft through insufficient security of passwords and personal details,
9. The use of new media and technology in distracting or addictive ways.

In order to develop age-appropriate responses to this wide range of risks, we categorise them, along with related learning objectives, as follows (adapted from Tanya Byron's '3 C's of E-safety'):

Risk category	Commercial	Aggressive	Sexual	Values
Content Child is observer/consumer	Understand and develop resilience to advertising, spam, sponsorships and demands for personal information	Develop resilience to violent/hateful content and know how to cope and to deal with it	Avoid/develop resilience to pornographic or unwelcome sexual content	Develop critical evaluation skills to identify bias, prejudice, misleading and manipulative information and advice
Contact Child is participant	Awareness of tracking, harvesting and the protection of personal information	Develop resilience to being bullied or harassed, and know what actions to take	Understand the implications of interacting with strangers and being groomed	Develop resilience to the risk of compulsive/additive online behaviour, and to unwelcome persuasions
Conduct Child is instigator/perpetrator	Clear guidance on illegal downloading, copying, plagiarising, hacking, gambling, fraud, identity theft and the consequences	Clear guidance on bullying, harassment or 'trolling' of others and understand the consequences	Clear guidance on creating and uploading inappropriate material and understand the consequences	Clear guidance on the value of personal integrity, respect, data security, confidentiality, and the consequences of publishing inappropriate, false or misleading information or advice

Key principles and controls

We take E-safety very seriously. In addition to all the general safeguarding principles and controls included within our *Safeguarding policy*, the over-arching principle with E-safety is the need to educate children about the risks and benefits of using new media and technology, and to help them to operate safely, legally, productively, thoughtfully and considerately in the digital world. This includes the development of independent thinking and critical evaluation skills to help determine the reliability, accuracy and integrity of on-line content.

E-safety is incorporated into the curriculum, not only within IT and PSHEE lessons, but wherever and whenever it makes sense to reinforce concepts at an age-appropriate level. This includes assemblies, guest speakers, and parent information events. We believe that the internet and the constantly evolving technologies and devices to which children have access can be tools that enrich their lives. We therefore teach them to view technology and new media positively whilst simultaneously protecting themselves.

Technological controls

In addition to the educational measures to promote E-safety within the curriculum, we maintain specific controls which enable us to establish a secure data and communications environment and to monitor children's digital activity within the boundaries of the school/college. Foremost amongst these are:

- a) Children to whom we provide bespoke⁴ access to IT resources are asked to agree in writing to a set of rules for the acceptable use of such resources (see *IT Usage policy*).
- b) Our password-controlled network maintains individual security, confidentiality and accountability for activity on the network.
- c) We use well-established and frequently updated filtering software to prevent access to content deemed to be potentially harmful, and which records attempts to access such potentially harmful content. If staff or children discover unsuitable sites, the URL (web address) must be reported to the IT Coordinator. Any member of the school/college community should report a website which causes them concern to the IT Coordinator who will immediately refer this to the on-site engineer who will arrange for that site to be blocked, always taking care to consider that potential 'over-blocking' does not lead to unreasonable restrictions in online learning.

The scope of the technological controls mentioned above extends across all our network of computers and internet-enabled devices, and across any Wi-Fi access which the school/college operates.

Whilst these filtering controls can similarly apply to mobile phones which use the school/college Wi-Fi, we cannot (legally or technically) monitor private phone activity, e.g. texting, or applications or internet content which are accessed via 3G, 4G and 5G signals. For this reason we operate a strict policy on the use of mobile phones (see Social Media, Mobile Phone and Student Photographs Policy).

Our staff are authorised to search for⁵ and to confiscate any device, and to search the device and (if appropriate) delete⁶ content, if they consider that it has been, or could be used to cause harm, to disrupt teaching or break the school rules. Inappropriate usage will be dealt with consistent with our policies on discipline, behaviour, sanctions and exclusions. If a member of staff has reasonable grounds to suspect that a device contains evidence in relation to an offence, they must give it to police as soon as is reasonably practicable. Any evidence of an offence or material that contains a pornographic image of a child should not be deleted prior to giving the device to the police.

The School/College IT Coordinator has specific responsibility for monitoring the effectiveness of the technological controls section of this policy, under the direction of the Alpha Plus Group Director of IT.

⁴ E.g. email accounts; network ID's and accounts; unsupervised browsing

⁵ If in doubt, staff should consult their Head/Principal and the Department for Education guidance:

If in doubt, staff should consult their Head/Principal and the Department for Education guidance: [Searching, screening and confiscation](#) (2018).

Parental responsibilities and off-site E-safety

Given that children's engagement with the digital world extends well beyond the school/college premises, we expect parents to remain alert to their children's activities and behaviour. We recognise that this is a broad and open-ended task which many parents find challenging. We therefore direct parents towards on-line resources which can help parents to take preventative action which will promote E-safety, and help them to identify risk-indicators of potentially problematic behaviour. We host workshops for parents to support strategies for staying safe online and we encourage parents to attend these where possible.

Regarding the responsibility of schools/colleges to deal with E-safety incidents which occur 'off-site', the Education and Inspections Act 2006 and the Education Act 2011 empower the school/college, to such extent as is reasonable, to:

- regulate the behaviour of children when they are off the school/college site where an E-safety incident is linked to the school/college
- impose disciplinary penalties for inappropriate behaviour
- search for and confiscate electronic devices, and search their contents, and where appropriate delete content

Reporting of E-safety incidents

An E-safety incident⁷, which includes the discovery of a specific or heightened risk, must be reported as soon as possible. If it in any way touches on child safeguarding issues, then it must be reported immediately to the DSL, consistent with the *Safeguarding policy*. Similarly, if it involves cyber-bullying, then the *Anti-bullying policy* must be followed.

If it relates to technological controls (as described above), or to a breach of the *IT Usage policy*, then it must be reported to the IT Coordinator.

Other members of staff and management should be informed as appropriate in the circumstances.

A log of E-safety incidents should be maintained. The reporting of E-safety Incidents should include the following data:

- Name of person reporting the incident
- Date and time of incident
- Date reported
- Names of people involved
- Location and device details
- Details of incident, including evidence where possible
- Clarification of the risk or breach – e.g. does it relate to safeguarding, bullying, inappropriate content, sexting, data protection, copyright infringement...etc.? Use the 3 C's categorization as described earlier in this policy.
- Initial action taken and current status

⁷ This may be understood as something of a serious nature which requires disclosure and remedial action.

Once investigated, a record of the resolution of the incident, and actions taken as a result, must be maintained. Such records should be readily available for inspection during governance visits.

Data in the E-safety log will be processed in line with Alpha Plus Group's Privacy Notice, which is available on request or can be accessed via the Group's [public portal](#).
