

# Curriculum Policy

Primary person responsible for updates to this policy: Donal Brennan

Job title: Headteacher

Last review date: June 2019

Next review date: June 2020

**Circulation:** This policy has been adopted by the governors and is available to parents on request. It is addressed to all members of staff and volunteers and applies wherever they are working with children.

'Parents' refers to parents, guardians and carers.

*"St. Anthony's School for Girls aims to provide high quality education in a caring, supportive and Catholic environment, infused by Christ's Gospel, in order that each of our pupils is able to develop fully as an individual, well-adjusted to the wider community."*

## Introduction

At St. Anthony's School for Girls, our aim is to provide a broad and balanced curriculum in an environment which challenges each child to be the best that they can be. The pastoral care and well-being of our girls underpins all academic, sporting and extra-curricular successes. The curriculum consists of the planned activities we organise in order to promote learning and personal growth and development. It includes not only the formal requirements of our curriculum, but also the range of extra-curricular activities that the school organises in order to enrich the experience of the girls. The curriculum is designed to provide a secure and imaginative basis for academic progress at each stage of girl's development. It builds on traditional teaching methods whilst utilising the exciting opportunities provided by new initiatives and technologies. We aim to teach the girls how to grow into positive, responsible people, who can work and co-operate with others while developing knowledge and skills, so that they achieve their true potential.

## Curriculum Aims and Objectives

The aims of our school curriculum are:

- To create a broad curriculum which gives pupils experience in linguistic, mathematical, scientific, technological, human and social, physical and aesthetic and creative education in a happy, secure and stimulating environment in which girls learn to work with concentration and enthusiasm.
- That pupils acquire speaking, listening, literacy and numeracy skills.
- To foster the importance of each girl as an individual, equipping her with the skills to be a lifelong learner, a well-rounded, happy and confident child.
- To promote the excitement and enjoyment in learning and investigating.
- To encourage girls to be independent learners; to be aware and take control of their own learning.
- We encourage tolerance, mutual respect, courtesy and thoughtfulness for others in school and in the wider community.
- To promote democracy, the rule of Law, individual liberty, mutual respect and tolerance of different faiths and beliefs. We aim to promote these values through the teaching of the Catholic Faith and all other aspects of our curriculum.
- Through individual learning we encourage girls to develop their talents, interests and self-belief.
- To prepare the girls for secondary school entrance exams.

## Organisation and Planning

We plan our curriculum in three phases.

*A long-term plan:* We agree a long term plan for each year group based on schemes of work for each subject. This indicates the topics taught in each term and to which groups of girls.

*Medium-term plans:* These give clear guidance on the objectives to use when teaching each topic and the assessment criteria used by teachers to assess the girls understanding. In the Early Years, the planning follows the Early Years Foundation Stage Curriculum. We use national schemes of work as

guidance for much of our medium-term planning in all non-core subject areas in Key Stage One and Key Stage Two. Each Medium Term plan is created by the Subject Coordinators (where applicable) and class teachers to ensure progression in skills and continuity in learning.

*Short-term plans:* Each year group and subject teacher will compile these on a weekly basis. They will set out the learning objectives for each session, and identify resources and activities which are going to be used in the lesson. It will also identify differentiation for each lesson at this stage, where necessary.

All Long, Medium and Short Term planning is saved on the Staff Shared Site so that all staff have access to them for teaching, learning and monitoring processes.

### **Children with Special Educational Needs**

Our curriculum is designed to provide access and opportunity for all children who attend the school, including those considered to have SEND or who have EAL. If it is necessary to adapt the curriculum to meet the needs of individual children, we do so in consultation with parents, the SENDCO, Headteacher and any other outside agency staff involved.

If a child has a specific need, our school does all it can to meet these individual needs. In most instances the teacher is able to provide resources and educational opportunities that meet the child's needs within the normal class organisation. We provide additional resources and support for children with special needs where appropriate.

The SENDCO in consultation with the class teacher provides a Support Plan (SP) for each of the children who are identified as needing additional support. This sets out the nature of the special need, and outlines how the school will aim to address the need.

### **The Foundation Stage**

Our Foundation stage is made up of one year group, Reception Class.

At SASG we believe that the Foundation Stage prepares the girls for learning in Key Stage One. We feel that the Foundation Stage is a critical time in children's development. The girls develop rapidly in a variety of ways: physically, intellectually, emotionally and socially.

The seven Areas of Learning and Development are:

#### *Prime Areas:*

- Communication and Language (CL) development involves giving children opportunities to experience a rich language environment; to develop their confidence and skills in expressing themselves; and to speak and listen in a range of situations.
- Physical Development (PD) involves providing opportunities for young children to be active and interactive; and to develop their co-ordination, control, and movement. Children must

also be helped to understand the importance of physical activity, and to make healthy choices in relation to food.

- Personal, Social and Emotional Development (PSED) involves helping children to develop a positive sense of themselves, and others; to form positive relationships and develop respect for others; to develop social skills and learn how to manage their feelings; to understand appropriate behaviour in groups; and to have confidence in their own abilities.

*Specific Areas:*

- Literacy (L) development involves encouraging children to link sounds and letters and to begin to read and write. Children must be given access to a wide range of reading materials (books, poems, and other written materials) to ignite their interest.
- Mathematics (M) involves providing children with opportunities to develop and improve their skills in counting, understanding and using numbers, calculating simple addition and subtraction problems; and to describe shapes, spaces, and measures.
- Understanding the World (UW) involves guiding children to make sense of their physical world and their community through opportunities to explore, observe and find out about people, places, technology and the environment.
- Expressive Arts and Design (EA&D) involves enabling children to explore and play with a wide range of media and materials, as well as providing opportunities and encouragement for sharing their thoughts, ideas and feelings through a variety of activities in art, music, movement, dance, role-play, and design and technology.

At SASG, we believe that these seven areas of learning are inter-dependent in promoting the development of a rounded child. The seven areas of learning help our Early Years practitioners plan the learning environment, activities, experiences and framework for the Reception curriculum. This does not mean that all young children's learning is divided into these areas; one experience could provide a child with opportunities to develop a number of competencies, skills and concepts across several areas of learning. We are also mindful of the school's position as a preparatory school, preparing children for the transition to Year 1 and ultimately for the 11+ school entrance procedure. It is our aim that this preparation and development across all areas of learning are delivered through planned, purposeful play-based activities, with a balance of adult and child-led activities.

## Key Stage One and Two

Throughout the rest of the school we use the National Curriculum Schemes of Work and various published schemes for the basis of our ideas and topics. We adjust the objectives and topics to suit the needs of the girls in the class. The girls will not be confined by the national targets but will be encouraged to attain their full potential. They are introduced to all areas of the traditional primary school curriculum. Throughout the school specialist teachers teach Drama, Music, French and PE. In the Upper School, Years 5 and 6, Mathematics, English and Science are taught by specialist teachers.

## Assessment

Effective assessment provides information to improve teaching and learning. Our pupils receive regular feedback on their learning, both verbal and written, so that they understand what it is they need to do to make progress and reach their full potential. We provide regular opportunities for self-evaluation. (Please see Assessment Policy)

### EYFS

On entry into Reception, a baseline assessment using PIPS BASE is carried out. This, combined with teacher observations of each pupils within all areas of the EYFS curriculum, provides a view of each girl's starting point. Throughout the school year, teacher observations are carried out regularly and are then used to make termly judgements against age-appropriate development matters statements and end of year Early Learning Goals (ELG). The judgements inform future lesson planning.

PIPS BASE is then repeated at the end of Reception. This provides a view of each girl's progress across the year, with value added assessment, as an on-going formal record measured against national levels as well their own progress.

### KS1 and 2

In Year 1- 6, girls are formally assessed twice a year for their reading, comprehension, spelling and maths. From Year 2, they take a Cognitive Abilities test once per year. A standardised score and age is recorded for each of these assessments to enable us to track the girls' progress.

### Reporting to parents

We are well aware that all children need the support of parents and teachers to make good progress in school. We strive to build positive links with the parents of each child by keeping them informed about the way in which the girls are being taught and how well each child is progressing. We have a curriculum morning at the start of the year to inform parents about regular routines, events and the specifics of the curriculum for that year group. This is supported by the curriculum notes.

We have two formal written reports each year. All year groups have a report for the core subjects with targets at the end of the first term and a summative report at the end of the year.

There are formal parents' evenings in the Autumn and Spring Term, which give parents the opportunity to discuss the reports and their daughter's progress. Should an issue arise staff meet with parents during the year as and when necessary.

## **Monitoring and Review**

The Headteacher in conjunction with the SENCO and Subject Co-ordinators are responsible for monitoring the way the school curriculum is implemented.

The class teachers are responsible for the day-to-day organisation of the curriculum and hold weekly meetings with the teaching assistants in their year group. The Headteacher monitors the planning for class teachers, ensuring that all classes are taught the full requirements of the Curriculum, and that all lessons have appropriate learning objectives.
